ABOUT ME

I'm a frontend developer based out of the Jersey Shore. I love working on fun, innovative websites. I've been involved in technology for almost two decades now. I'm a bit of a perfectionist and take a lot of pride in all of my work. I try to leave every piece of code a bit more modular, performant and readable than how I found it. The web is constantly evolving and I do my part in staying up to date with latest trends and solutions.

EXPERIENCE

Frontend Developer

Plixer

Sep 2019 – Present

- Assisted in re-architecting network traffic analysis system from a legacy tech-stack to modern Angular 8+ framework
