📍 Jersey Shore

## EXPERIENCE

### Frontend Developer

#### Plixer

Sep 2019 – Present

Work within the product development team re-architecting their network traffic analysis product to a modern frontend stack.

**Tech Stack:** Angular 8+, Typescript, Bootstrap

### Frontend Engineer

#### CityBldr

May 2017 – May 2020

Leading user interface development for product platform and consumer sites. Technology leverages Artificial Intelligence, machine learning and data science to determine the best value and uses for land for both sellers and buyers.

**Tech Stack:** React, Redux, Material UI

## ABOUT ME

Hello! I'm a frontend developer based out of the Jersey Shore. I love working on fun, innovative websites. I've been involved in technology for almost two decades now.

## SKILLS

### Coding

## EDUCATION

### Bachelors of Science, Computer Science

University of Delaware

## Sr. UI Developer

AffinityX

Jan 2015 – May 2020

Senior developer on building company's proprietary creative content delivery platform tailored for SMB's requiring a white label digital advertising and marketing solution. The platform simplifies the entire process from fulfillment, order tracking to production with a fully integrated proofing system and complete administrative console.

**Tech Stack:** KnockoutJS, jQuery, PHP

## Frontend Engineer

ThreadLab, Inc

May 2014 – Jan 2020

Assisted in building a solution for a men's shopping service platform for males who hate to shop. Focused on menswear basics and essentials from well known brands. The service uses technology, rather than the typical stylist, to ensure customers receive perfectly fitting garments.

**Tech Stack:** Angular 5+, Typescript, NodeJS, Bourbon

## Software Engineer

Do Something

May 2014 – Jan 2015

Contributed to open-source Drupal platform, interface framework and pattern libraries.

**Tech Stack:** Drupal 7, jQuery, RequireJS, Bourbon

## Senior Software Engineer

CPXi

Oct 2013 – May 2014

Senior application developer for Consumer Apps and Real-time divisions. Building various products such as browser plugins and real-time data-driven applications.

**Tech Stack:** Handlebars JS, Laravel, Symfony, LESS, NodeJS, Sails MVC

## Frontend Tech Lead

Alexander Interactive

Jul 2006 – Oct 2013

Built, managed and lead a team of seven Frontend developers. Developed and re-wrote several re-usable JavaScript widgets from Prototype JS to jQuery. Introduced HTML5 and CSS3 to Magento applications. Defined and authored the company's best practices and coding standards document for Frontend development.

**Tech Stack:** jQuery, PrototypeJS, LESS, CSS3, Magento, OfBiz, .NET Web API
